

Curriculum Vitae - Yewon Han

Ph.D program in Steinegger Lab, Seoul National University
Interdisciplinary Program of Bioinformatics, College of Natural Sciences
lhkyewon@snu.ac.kr, ORCID: 0009-0006-0601-8596, Korean citizenship

Research interests

My current research focuses on method development and data science for large-scale protein structure prediction and analysis as part of collaborative efforts to build open-access biological resources. My broader interests include structural bioinformatics and applying new computational approaches to biological problems.

Education

3/2018–08/2024	B.Sc. in Biology, <i>summa cum laude</i> Honors: Dean's List (two-time honoree) Seoul National University, Seoul, Korea
3/2015–02/2018	Sejong Academy of Science and Arts, Sejong, Korea

Research experience

Since 09/2024	Graduate student researcher (Integrated M.S./Ph.D. Program) with Prof. Martin Steinegger Steinegger Lab, Seoul National University, Seoul, Korea
07/2023–8/2024	Undergrad lab intern with Prof. Martin Steinegger Steinegger Lab, Seoul National University, Seoul, Korea
12/2022–01/2023	Undergrad lab intern with Prof. Ji-Young Lee Plant Systems Genetics Lab, Seoul National University, Seoul, Korea
07/2022–08/2022	Undergrad lab intern with Prof. Junseock Koh Laboratory of Biophysical Chemistry, Seoul National University, Seoul, Korea
03/2016–06/2017	Independent Research Project with Dr. Jaegu Lee Sejong Academy of Science and Arts, Sejong, Korea

Publications

[\(link to google scholar\)](#)

Han, Y., Tsenkov, M. I., Venanzi, N. A., Cha, S., Patel, N., Nair, S., ... & Dallago, C. (2026). AlphaFold Database expands to proteome-scale quaternary structures. *bioRxiv*, 2026-03.

Yeo, J., **Han, Y.,** Bordin, N., Lau, A. M., Kandathil, S. M., Kim, H., ... & Steinegger, M. (2025). Metagenomic-scale analysis of the predicted protein structure universe. *bioRxiv*, 2025-04.

Collaborative Projects & Database Contributions

AFESM

Contributed to AFESM, an integrated resource combining predicted protein structures from the AlphaFold Database and ESM Metagenomic Atlas to explore protein structural diversity at metagenomic scale.

AlphaFold Database - Protein Complex Structures of 4k+ Proteomes

Contributed to a collaborative effort to expand the AlphaFold Database with proteome-scale predictions of protein complex structures.

AlphaFold Database - Pandemic Preparedness

Contributed to collaborative work on viral protein and protein complex structure resources for pandemic preparedness.

Talks

Nov 2026 3DSIG, ISMB 2026, Washington D.C., U.S.A.

Selected posters

Aug 2026 iscbAI 2026, Bali, Indonesia
Jan 2026 KMB 2026, Pyeong-chang, Korea
May 2025 RECOMB 2025, Seoul, Korea

TAing & tutoring

Spring/Fall 2026 TA, Interdisciplinary Program of Bioinformatics Seminar
Spring 2024 Core programming, Faculty of Liberal Education
Spring 2024 Introduction to programming, Faculty of Liberal Education
2019-2021 **Tutor, Python Programming**, Binary (departmental student club),
Department of Biology, Seoul National Unvesity.

Peer review

I have peer reviewed a publication in Protein Science.

Languages

Native Korean
Fluent English
